

DRUG EDUCATION IS ONGOING

The use of alcohol and other drugs can impact on the safety of our sport of sprintcar racing. The SCCA has implemented policies, rules and regulations to minimise the impact.

The SCCA Drug Policy, the 2016 Prohibited Lists and support documents are available for download from the SCCA website.

In addition to the print and PDF formats, the World Anti Doping Authority (WADA) has made available the list and its related documents for mobile devices and as an iPhone/iPad application. Visit the App Store to download your FREE Prohibited List iPhone Application.

The Australian Sports Anti Doping Authority (ASADA) also has a number of educational resources available on its website.
